GOLDEN HOPE MINES LIMITED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2002
(Unaudited)

Note 1

Basis of Presentation

The financial statements include the accounts of the Company, its 51% owned subsidiary, Jobs Without Borders Inc. (Note 2) acquired April 4, 2002 and its wholly owned subsidiary, Golden Hope Mining Company incorporated in the state of Nevada, from incorporation date, November 17, 1997.

Continued Operations

The financial statements have been prepared on a going concern basis which assumes the Company will continue to operate throughout its next fiscal period subsequent to September 30, 2002. Adverse conditions cast doubt upon the validity of this assumption. The future of the Company is dependent upon the Company's ability to obtain sufficient cash from external financing and generate future revenues.

If the going concern assumption was not appropriate, then adjustments would be necessary in the carrying values of the assets and liabilities, expenses and balance sheet classifications used.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

Significant Accounting Policies

Financial Instruments

The Company's financial instruments include cash, accounts receivable, accounts payable and amounts due to related parties. Unless otherwise noted it is management's opinion that the Company is not exposed to significant interest rate, currency and credit risks arising from these financial instruments. The fair value of the short-term financial instruments approximates their market value.

Loss Per Share

The loss per share figures have been calculated using the weighted average number of common shares outstanding during the respective fiscal periods.

Nature of Operations

The Company is in the process of exploring its resource properties and has not yet determined whether the properties contain economically recoverable reserves. The recovery of the amounts shown for the resource properties and the related deferred expenditures is dependent upon the existence of economically recoverable reserves, confirmation of the Company's interest in the underlying mining claims, the ability of the Company to obtain necessary financing to complete the development and upon future profitable production.

Mineral Properties

Mineral properties are carried at cost until they are brought into production at which time they are depleted on a unit-of-production basis. Exploration expenditures relating to mineral properties are deferred until the properties are brought into production at which time they are amortized on a unit-of-production basis. The cost of properties abandoned or sold and the deferred exploration expenditures relating to properties abandoned or sold are charged to deficit in the current year. If in the opinion of management the results of exploration are not sufficiently promising to warrant further work, or further development has not occurred over a three-year period there is a presumption of impairment and accordingly the carrying values will be written down to a nominal carrying value.

Website

The website is recorded at cost less accumulated amortization and is amortized over 3 years on a straight-line bases.

Administrative Expenses

Administrative expenses are charged to operations in the current year.
